No doubt McKinley, Hanna, Reed & Co, would like to have Congress off their hands before the Spanish question is finally settled. It goes without sayng, however, that the administration made an egregious mistake in letting the lawmakers know that they were persona non grata, for Congress is sometimes contrary, and since it can only be adjusted by its own action, it is by no means certain or even probable Is by no means certain or even proteine that the President's wishes will be completed with. As a matter of fact, they should not be in this case. The registative branch of the government is just as match interested in the maintenance of the factor and dignity of the nation as line executive can be, and it is right and proper for when to be in session when the report of the board of inquiry is finally made, and if Congress is as feelous of its preventitives as a standard for the proper for the board of inquiry is finally made, and if Congress is as feelous of its preventitives as a should be. McKintey will not be allowed to play a lonesome hand in the interesting international game now in progress.

Soid to H. W. Sileby a for it 19,500; to H. W. Sileby another bot at 13,600; to E. M. Delano, 31,500; to H. A. Williams, \$5,500; Colonel Thomas Tabb, 44,000; D. S. Johns, \$5,500; and another whose name we cannot mention, as the deed has not yet passed, at \$5,700.

I know of six buildings which will be rected on this avenue during this serion, which will cost in the aggretic about \$100,000. The erection of these buildings together with the public buildings and work of the city, when is to cost \$140,000, and the million doclar improvement at the dry dock, along with certual industrial plants which will be built, must increase the already be sk times in our city.

Wonderful Wax Making. Bees gorge themselves with honey, then hang themselves up in festoons or curtains to the hive, and remain quiescent for hours; after a time wax guiescent for hours, after a time wax scales appear, forced out from the wax pockets. The bees remove these scales with their natural forceps, carry the wax to the mouth, and chew it for a time thus changing it chemically. Thus It may be seen that wax-making is a great expense to the colony, for it costs not only the time of the workers, but it is estimated that twenty-one pounds of honey are required to make one pound of wax.
